

**Nomination Form for TAPPI's International Nanotechnology Division
Mid-career Award**

Submission Deadline: April 15, 2020

Requirements:

- Candidate must be less than 20 years past the date of their latest degree work (bachelors, masters, or doctorate).

Instructions

Submit the following documents to Lisa Stephens at lstephens@tappi.org.

1. A letter recommending the nominee
2. The completed nomination form
3. A current CV detailing work experience, publications, patents, etc.

Tell us about who you are nominating:

Nominee:

Title:

Company:

Address:

City, State, Zip Code:

Country:

Research Contributions

List the area(s) where the nominee has shown novelty in research contributions related to the field of nanotechnology of renewable materials. Indicate how these contributions have impacted the research community and/or industry, either directly or indirectly.

Impact on Community

Describe how the nominee has had an impact on other people's careers. For more academic-based nominees, consider education and training (e.g. lectures, mentoring, PhD and MS students advised) and other mentoring activities. For industry nominees, consider thought leadership, influencing the work of others in the global R&D community, and developing subordinates who became R&D leaders in the industry, mentoring, lectures at conferences and schools, etc.

Contributions to TAPPI Nano Division

Describe what contributions the nominee has made to the technical community through active involvement in the TAPPI Nano division (and/or similar organizations – please name them). Consider organizing conferences, chairing sessions, and chairing committees, technical presentations at conferences, webinars, authoring or revising standards and TIPs. Minimum criterion is that a person has been a TAPPI member for several years at some point in their career, preferably a current member but not necessarily so.

Publications/Patents

As related to nanotechnology of renewable materials, list the top 10 most impactful publications, also list the top 10 most impactful patents. Include all authors, year, title, journal, volume, and page numbers. Calculate the average impact factor over all publications. List the nominee’s total number of citations. To assist the review committee, it would be advantages to provide a brief statement (1-2 sentences) for each of why/how they were impactful. This can/should be linked back to the descriptions on research contributions, and/or impact on community.

Research Funding

As related to nanotechnology of renewable materials, list the top 10 research funding. To assist the review committee, it would be advantages to provide a brief statement (1-2 sentences) for each of why/how they were impactful. This can/should be linked back to the descriptions on research contributions, and/or impact on community.

Professional Honors Received

List title of any awards, granter and date.
